## 1. Qualitative Information

### (1) Business Performance

#### a. General Summary of Results

The global economy for the current consolidated first quarter deteriorated rapidly since the economic activities in every country were suppressed due to the global spread of COVID-19. In the regions where the NAGASE Group operates our business, the economic activities in the Americas, Europe, and ASEAN are still stalled, except for Greater China, where the economic activities are gradually being reopened. The Japanese economy also deteriorated rapidly mainly due to stagnant consumption and significant decline of export.

In this environment, the Company recorded domestic sales of ¥82.17 billion (-19.2% year on year) for the current consolidated first quarter. Overseas sales amounted to ¥98.39 billion (+7.8%). In spite of the addition of sales from the Prinova Group acquired by the Company in the prior consolidated second quarter, the Company recorded net sales of ¥180.56 billion (-6.4%) in total due to a significant decrease among existing Group companies.

The Company recorded gross profit of ¥26.05 billion (+2.6%), as a result of the high profitability of the Prinova Group exceeding the impact of the Company's sales decrease. Despite the contribution of the Prinova Group, operating income amounted to ¥3.67 billion (-30.1%) and ordinary income ¥4.23 billion (-27.5%) mainly due to decreased income in existing Group companies and increased investment costs of promoting the digital transformation (DX) for medium- and long-term growth. Profit attributable to owners of the parent amounted to ¥6.8 billion (+63.8%) mainly due to the recording of profits stemming from the sales of certain shares owned by the Company.

#### b. Segment Summary

##### Functional Materials

The Functional Materials segment recorded lower sales in both domestic and overseas markets mainly due to lower automotive production in Japan and overseas attributable to the impact of the COVID-19 pandemic.

The Performance Chemicals business recorded materially lower sales due to lower sales in coating raw materials and urethane materials, as a result of lower automotive production in Japan and overseas.

The Speciality Chemicals business recorded lower sales overall due to decreased sales of industrial oil solutions and plastic materials arising from the impact of the weak automotive industry, although the sales of electronics chemicals for the semiconductor and other related electronics industries decreased only slightly.

As a result, sales for the segment amounted to ¥34.36 billion, representing a ¥9.23 billion (-21.2%) decrease compared to the same period in the prior fiscal year. Operating income fell ¥580 million (-39.1%) to ¥910 million compared to the consolidated first quarter of the prior fiscal year.

##### Advanced Materials & Processing

The Advanced Materials & Processing segment recorded lower sales in both domestic and overseas markets due to the broad impact of the COVID-19 on the resins and other businesses.

The Colors & Advanced Processing business recorded lower sales overall, due to decreased sales of dyes and additives, digital print processing materials, and plastic resins for industrial and packaging applications and conductive materials in Japan.

The Polymer Global Account business mainly sells plastics to the office equipment, appliance, and video game device markets. Sales in these businesses were lower overall, caused by decreases in Japan, Greater China, and ASEAN.

As a result, sales for the segment amounted to ¥58.23 billion, representing a ¥9.15 billion (-13.6%) decrease compared to the same period in the prior fiscal year. Operating income fell ¥560 million (-28.0%) to ¥1.46 billion.

## Electronics

Despite increased sales of precision processing-related materials used in connection with intermediate processing in semiconductors, the Electronics segment recorded lower net sales overall driven by lower sales of materials related to the photolithography, formulated epoxy resins for the heavy and light electrical equipment industry, equipment, and display.

As a result, sales for the segment amounted to ¥26.06 billion, which was a ¥550 million (-2.1%) decrease year on year. Operating income was ¥1.73 billion, an increase of ¥450 million (+36.1%) year on year, mainly due to improved profitability among the Company's manufacturing subsidiaries.

## Mobility & Energy

The Mobility Solutions business recorded significantly lower sales both in Japan and overseas, due to lower sales of car electronics-related products in Japan and lower sales in the resins business both in Japan and overseas as a result of lower automotive production in Japan and overseas attributable to the impact of the COVID-19 pandemic.

As a result, sales for the segment amounted to ¥18.97 billion, representing a ¥13.57 billion (-41.7%) decrease year on year. Operating loss was ¥160 million, a decrease of ¥690 million from operating income of ¥520 million in the same period of the previous year.

## Life & Healthcare

The Life & Healthcare segment recorded significantly higher sales overall, due to higher sales overseas driven by the addition of sales from the Prinova Group acquired by the Company in the prior consolidated second quarter, though domestic sales decreased mainly due to lower demand attributable to the impact of the COVID-19 pandemic.

The new Food Ingredients business recorded significantly higher sales overall, due to higher sales of TREHA™ and other products overseas in the food materials field, despite a decline in their domestic sales, as well as the addition of sales from the Prinova Group.

The Life & Healthcare business recorded lower sales overall, due to lower sales of the pharmaceutical business, despite higher sales of pharmaceutical raw materials and intermediates and medical materials, in the medical and pharmaceutical field and lower sales in Japan and overseas of AA2G™ in the skin care and toiletries field.

As a result, sales for the segment amounted to ¥42.82 billion, which was a ¥20.13 billion (+88.7%) increase compared to the consolidated first quarter of the prior fiscal year. Operating income decreased ¥0 million (-0.2%) to ¥1.39 billion, mainly due to weaker profitability among the Company's manufacturing subsidiaries in Japan.

## Others

No special matters to disclose.

## (2) Financial Position

As of the end of the consolidated first quarter, current assets amounted to ¥361.52 billion. This represents a decrease of ¥17.81 billion compared to the end of the prior consolidated fiscal year due to decreases in cash and deposits and accounts receivable, despite an increase in inventories. Non-current assets amounted to ¥238.41 billion, up ¥6.27 billion from the end of the prior consolidated fiscal year. This increase was mainly due to an increase in investment in securities stemming from a rise in the fair value of shares owned by the Company, despite a decrease resulting mainly from the amortization of intangible fixed assets. As a result, total assets decreased ¥11.53 billion to ¥599.94 billion compared to the end of the prior consolidated fiscal year.

Liabilities amounted to ¥277.57 billion, a decrease of ¥20.65 billion compared to the end of the prior consolidated fiscal year. This decrease was mainly due to decreases in accounts payable and commercial paper.

Net assets amounted to ¥322.36 billion, up ¥9.12 billion compared to the end of the prior consolidated fiscal year. This increase was mainly due to the recording of profit attributable to owners of the parent in the amount of ¥6.8 billion, as well as an increase in net unrealized holding gain on securities.

As a result, the Company recorded a shareholders' equity ratio of 52.4%, up 2.5 points compared to the end of the prior consolidated fiscal year.

### **(3) Qualitative Information Related to Consolidated Earnings Forecasts**

Our consolidated earnings forecasts for the current fiscal year were created based on the assumption that the impact of the COVID-19 pandemic will largely abate in the second half. However, our sales for the consolidated first quarter were relatively stronger than those in the previous earnings forecasts, mainly due to a temporary increase in the demand caused by a supply uncertainty attributable to the spread of the COVID-19 pandemic.

We forecast that, though there is a concern that the recovery of the economy may be delayed by the further spread of the COVID-19 pandemic, the economy will gradually recover in the second half. Therefore, at this point, we will not make changes to the consolidated earnings forecasts released on May 14, 2020.

#### **(Additional Information)**

(Application of Tax Effect Accounting for Transition from Consolidated Taxation System to Group Tax Sharing System)

The Company and certain domestic consolidated subsidiaries have calculated the amounts of deferred tax assets and deferred tax liabilities in accordance with the provisions of tax laws in Japan prior to the amendments based on the treatments stipulated in Paragraph 3 of *Practical Solution on the Treatment of Tax Effect Accounting for the Transition from the Consolidated Taxation System to the Group Tax Sharing System* (Accounting Standards Board of Japan (ASBJ) Practical Issues Task Force No. 39, March 31, 2020) instead of applying the provision of Paragraph 44 of *Implementation Guidance on Tax Effect Accounting* (ASBJ Guidance No. 28, February 16, 2018), regarding the transition to group tax sharing system provided for in *Act for Partial Amendment of the Income Tax Act, etc.* (Act No. 8 of 2020), and items for which the non-consolidated taxation system has been reviewed in line with the transition to the group tax sharing system.

(Effects of COVID-19 Pandemic When Making Accounting Estimates)

The Group made accounting estimates related to impairment loss on non-current assets and recoverability of deferred tax assets, etc., based on information available at the time the consolidated financial statements were prepared.

Regarding the impact of the novel coronavirus disease (COVID-19), the Group's accounting estimates reflect the assumption that the impact will gradually recover in the second half of the fiscal year ending March 31, 2021. However, no material changes are made to the assumption of estimates described in Additional Information of Annual Securities Report for the previous consolidated fiscal year. There are still many uncertain factors regarding the impact of COVID-19 and it may affect the financial condition and operating performance of the Group in the consolidated second and subsequent quarters.
